A woman with long dark hair, wearing a white and grey vertically striped dress, stands by a swimming pool. She is leaning forward with her hands on her hips, looking down at the water. The pool has blue and white tiles on the bottom. A black metal railing is visible on the right. The background shows a bright, possibly overexposed sky.

SICIS Metallismo

Product

Mosaic collection in steel and brass on a red two-component polyurethane resin support which identifies the Sicis Metallismo product, the outcome of a patented advanced and technological process.

Laboratory tests (on resistance to separation) have proved the perfect and long-lasting cohesion between the metal and the red support.

The standard production uses Inox Steel Aisi 304 (thickness 6/10). Other characteristics specific to this product are shown in the non-oxidation of its steel surface, in its resistance to scratching and to staining, as well as in its lightness and flexibility.

The collection is composed of six different formats for seven different surface types.

Possible Aesthetic Enrichment

Infinite. The section dedicated to decoration speaks for itself, numerous combinations simply linking together different formats with different finishes.

Applications

Horizontal and vertical decoration of public offices and every type of private development: commercial areas, even those heavily trafficked; residential buildings of every form; hotel and tourist structures.

For applications in the Aquatic and Swimming Pool sector there is available upon request the high-tech range (Inox Aisi 316) resistant to the possible attack of corrosive agents, inevitably present in these sectors.

For applications on heating cement backing surfaces please contact us before any use.
