I

a mutaforma collection

R

Mutaforma
è il brand italiano che
lavora nell'ambito dei
materiali aumentati
a partire dal vetro
grazie all'impiego di
nanotecnologie.
Particelle di dimensioni
nanometriche, con
specifiche proprietà
chimico-fisiche, vengono
depositate su matrici di
vetro cambiandone le
caratteristiche ottiche e
la valenza estetica.
Un nuovo materiale
stratificato, composito,
intelligente con una
vocazione naturale
ad innestarsi in altri
materiali aumentando
le opportunità
d'interazione ed
esperienza:
augmented materials.

*Mutaforma
is the Italian brand that operates in the field of
augmented materials through the application of
nanotechnology.
Nanometric particles with specific physical and
chemical features, sublimed on the vitreous
surface at molecular level, change the optical
properties of glass and its aesthetic significance.
A new stratified, composite and smart material
with a natural tendency to merge and graft
with other materials to augment experience
and interaction options: augmented materials.*

Manifesto

**I materiali della nostra vita rappresentano
qualcosa di più della loro funzione pratica.
Sono la nostra seconda pelle.**

**Custodiscono la memoria,
sono sempre intorno a noi.
Danno forma alle nostre esperienze e sono
l'involucro delle nostre emozioni.
Costituiscono un incantevole miscuglio
tra fascino e funzionalità.
Raccontano la nostra storia.**

**Con l'interesse e l'obiettivo di nutrire queste
connessioni, proponiamo e orgogliosamente
produciamo in Italia un materiale ad
alta tecnologia caratterizzato da proprietà
fisiche, accostamenti produttivi e
creativi inediti.**

**Il nostro sguardo è irrequieto,
scandagliante e ardito:
cerca continuamente di distillare estratti
per un nuovo Rinascimento della materia
nel primo quarto di Luna
del 21° secolo.**

*Materials in our life
mean more than their practical function,
they are our second skin.*

*Materials trigger memories, surround us,
shape our experiences and encase our emotions
in an enchanting combination
of fascination and functionality.
Materials tell our story.*

*Committed to nurturing such connections,
we proudly manufacture in Italy a high-tech
material characterised by innovative,
productive and creative features,
taking special care of the sensory and emotional
dimensions the material entails.*

*Our eye is restless, exploratory and dauntless:
constantly on the lookout for the essence of a new
Renaissance of materials
in the first quarter Moon
of the 21st century.*

Winner 2018

La Fondazione Altagamma riunisce le eccellenze dell'industria culturale e creativa italiana considerate ambasciatrici del Made in Italy nel mondo e promuove il Premio Giovani Imprese - "Believing in the Future", in collaborazione con Borsa Italiana, Maserati e SDA Bocconi.

Nel 2018 Mutaforma si è aggiudicata il Premio come miglior brand emergente nella categoria Design, per la qualità e l'innovazione dei propri prodotti.

Altagamma Foundation gathers high-end Italian cultural and creative brands, globally recognized as authentic ambassadors of Italian style and promotes the award "Premio Giovani Imprese – Believing in the Future", in collaboration with Borsa Italiana, Maserati and SDA Bocconi.

In 2018 Mutaforma received this prestigious Prize as the best emerging brand in the Design category, thanks to the quality and the innovation in their products.

TILLA®

The smallest squared glass tesserae in the world

(1,5 mm - real scale)

TILLA® è la tessera in vetro più piccola al mondo (1,5 x 1,5 x 1 mm), resa possibile dalla tecnologia proprietaria del brand.

Composta da 17 nanolayer dallo spessore infinitesimale, è compatta, raffinata, intelligente, leggerissima e caratterizzata da una elevata resistenza.

All'origine di TILLA® c'è la volontà di declinare il mosaico in vetro attraverso nuovi scenari progettuali e sfide del design.

“Rain” è il tratto distintivo del processo creativo Mutaforma: un posizionamento delle tessere che permette di ottenere una resa dei dettagli ineguagliabile, grazie alla caratteristica disposizione ad «opus incertum» delle pico-tessere TILLA®.

**La creatività esplode, il design prende forma.
I colori sfumano e ricreano l'intero spettro cromatico.**

TILLA® is the smallest glass tessera worldwide (1,5 x 1,5 x 1 mm) created thanks to the brand's unique proprietary technology.

With its 17 nanolayers of infinitesimal thickness, TILLA® is compact, refined, smart and lightweight. A superior product, offering virtually unlimited durability.

TILLA® was created to bring the art of glass mosaics a step forward, making it the perfect fit for new architectural scenarios and design challenges.

Mosaic tesserae are set in a unique “Rain” technique, distinguishing feature of Mutaforma: the peculiar effect obtained with the TILLA® pico-tesserae positioning is based on the «opus incertum» placement, which ensures unparalleled details.

When creativity is unleashed, design comes to life.

Colours tone down, creating new hues and sensations.

TILLA® in Rain

La collezione TILLA® in Rain racconta di stanze dalle pareti vibranti di luci, ombre e colori che disegnano misteriose narrazioni da vivere per chi le abita.

Mutaforma riporta in primo piano le sue capacità figurative dalle basi formali del mosaico classico, incoraggiando i designer alla ricerca di nuove qualità delle superfici e stimolando l'espressione di un alto grado di intensità emotiva e relazionale con i materiali.

The TILLA® in Rain collection revels around vibrant walls bursting with light, shadows and colours that weave magical narratives in living spaces. Mutaforma highlights the brand's innate figurative skills and craftsmanship, true to their classical background and elicit designers to explore the qualities of surfaces, and to play with materials to create emotionally intense design experiences.

TILLA® in Rain è un abaco di più di 80 disegni, segni e soggetti declinati in un'ampia varietà di artwork concepiti per la decorazione di interni: dall'astrattismo ai codici geometrici e informali.

Una risposta sensoriale per vivere in maniera altamente personale gli spazi architettonici attraverso giochi di luce, ombra, colori e forme.

TILLA® in Rain includes more than 80 designs, graphisms and themes, a wide proposal of artworks conceived for the interior decoration: the sources of inspiration range from abstract art to informal hints.

A sensory response to experience the quality of architectural space in a highly personal way through the play of light, shadows, colours and shapes.

Tailor made

Un servizio su misura

Bespoke creations

Il materiale mutaforma esprime un perfetto equilibrio tra ricerca tecnologica, esperienza e creatività progettuale.

La sfida è quella di realizzare in pico-tessere TILLA® qualsiasi soggetto proposto dal Cliente, mantenendo viva l'emozione artistica e il valore artigianale, al pari di un'opera d'arte.

Mutaforma's material results from a unique combination of technological research, know-how and creativity.

The challenge is to recreate any design requested by the Client with minuscule TILLA® pico-tesserae, blending top-notch craftsmanship and intense artistic emotion to produce "works of art".

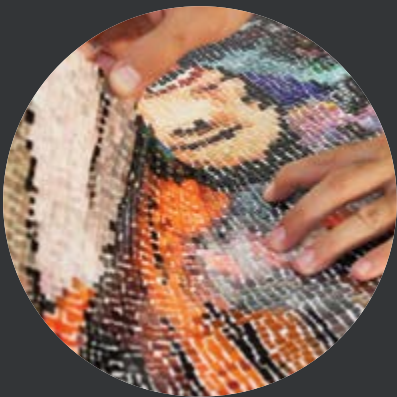

1. Il Cliente invia il proprio progetto oppure sceglie un soggetto già a catalogo.

1. The Customer sends their own project or selects a design from those included in collections.

2. Il Design Team di Mutaforma realizza il progetto artistico sulla base di quanto ricevuto.

2. Mutaforma's Design Team creates the artistic project based on the Customer's requirements.

3. Viene prodotto l'artwork finale "su misura", unico ed esclusivo nel suo genere, utilizzando la particolare disposizione delle pico-tessere TILLA® ad "effetto pioggia" (Rain).

3. We finalise the "custom made" artwork based on the project specifications, by placing the pico-tesserae TILLA® set in a unique "rain pattern" (Rain).

In this picture: Amazon (wall)

Formati

Formats

Grazie alla sua versatilità, Mutaforma offre la migliore soluzione progettuale garantendo un elevato grado di flessibilità e applicabilità a diversi supporti.

Thanks to its versatility, Mutaforma proposes the best solution for your projects: the mutaforma's material ensures superior flexibility and can be easily adapted to different supporting surfaces.

Pannelli premontati

La soluzione ideale per una posa facile e veloce. Ideali per la realizzazione di artwork in varie dimensioni e forme, capaci di rendere ogni spazio unico e prezioso. L'estrema leggerezza agevola la posa del materiale anche a soffitto riducendo i costi di posa e di pulizia di cantiere. La soluzione ideale nel settore navale e nell'arredo.

*Premountd panels
Premounted and pre-grouted panels feature an easy installation.
The ideal solution for floor medallions, inlaid wall artworks can be manufactured in different sizes and shapes, able to make each room unique and precious.
The extreme lightness of the premounted panel makes it suitable for ceiling decorations as well as in naval and furniture projects saving laying time and operative costs.*

Backlit

Per poter trasmettere la luce, le singole TILLA® vengono laminate sul pannello vitreo. Ne risulta un pannello retroilluminabile di forte impatto scenico. I pannelli retroilluminabili sono forniti prefiniti su supporto di vetro stratificato (sp. 10 mm) e possono essere a singola o doppia esposizione secondo necessità.

*Backlit
Colorful lighting effects can be obtained when individual TILLA® tesserae are laminated onto glass support (10 mm thick). Backlit panels are pre-mounted solutions and can be provided as single or double exposition setting, according the individual project requirements.*

Grandi superfici

Le potenzialità di Mutaforma garantiscono ad architetti e progettisti infinite possibilità di personalizzazione: dalla hall di un hotel alle lounge esclusive; dalla progettazione delle camere alla zona SPA.

*Large surfaces
There are no limits to what architects and designers can realize: from hotel halls to suggestive lounge areas; from comfortable room design to relaxing SPA areas.*

Informazioni tecniche

Technical info

Prestazioni

I prodotti in collezione sono sviluppati per applicazioni decorative in interni o in ambienti esterni protetti dalle intemperie.

I moduli mutaforma consentono tempi di posa inferiori rispetto ai sistemi tradizionali grazie ai bordi tagliati a laser che garantiscono un incastro “maschio - femmina” prespaziato agevolando il lavoro di posa.

Lo spessore di pochi millimetri rende il materiale mutaforma idoneo per essere posato anche su superfici esistenti opportunamente rasate.

Il ridotto peso al mq garantisce vantaggi nel trasporto ed evita lo scivolamento del materiale nella posa in verticale.

Material performances

These products are suitable for decorative interior applications and sheltered exterior uses.

Mutaforma's hypertechnological support modules guarantee optimized laying time thanks to the puzzle-like joints technology that permits to ease the installers.

Being only a few millimeters thick, mutaforma's material can be laid directly on existing levelled surfaces.

The limited weight per square meter grants advantages in transportation and handling costs and avoids vertical slip while laying.

Per una posa a regola d'arte

1. Controllare che il sottofondo sia perfettamente liscio, coeso, maturato e privo di asperità. Il materiale mutaforma è copiativo al pari di una carta da parati.

2. Stendere il giusto spessore di collante tramite l'apposita spatola dentata fornita in dotazione. Controllare lo spessore del collante.

3. Consultare le mappe di posizionamento e il manuale di posa contenuti nella confezione. Video: vimeo.com/mutaforma/laying

Le operazioni di taglio devono essere effettuate con disco diamantato o waterjet.

The perfect laying

1. The substrate must be perfectly smooth, cohesive and well dried. Avoid bumps and dips: mutaforma's material behaves like a decorative wallpaper.

2. Spread the right quantity of glue using the specific spatula. Mutaforma's material requires only a thin layer of glue.

3. Follow the enclosed manuals and data sheets. Watch the video: vimeo.com/mutaforma/laying

Cuts can be made with diamond disc or waterjet.

Illuminazione ottimale

La brillantezza del materiale viene esaltata da sorgenti luminose frontali quali: finestre, spot e luci diffuse. Si sconsiglia l'uso di luci radenti.

Lighting tips

Material brightness is enhanced by frontal lighting sources such as: windows, diffused lights, focused spotlight. Avoid grazing lights.

Scivolosità in ambienti umidi

Classe di resistenza: R 10 (DIN 51130:2004)

Slipperiness in humid environments

Resistance class: R 10 (DIN 51130:2004)

Pulizia ordinaria

Utilizzare un panno pulito imbevuto di un comune detergente domestico per vetro o una miscela di acqua calda e alcol. Detergenti e panni abrasivi potrebbero opacizzare il vetro. Non utilizzare sostanze acide o corrosive.

Daily cleaning

Use a soft cloth imbued with a domestic glass-cleaner or a mixture of hot water and alcohol. Abrasive products may matt glass. Do not use acid or corrosive detergents.
